**⚠️ Alkali-Sensitive:** Colors that are more likely to fade early when used on highly alkaline surfaces, such as new masonry.

**🕒 Interior Use Only:** Colors with a low resistance to the sun's ultraviolet (UV) rays, causing them to fade.

**IMPORTANT INFORMATION ABOUT PAINT COLOR:** Color chips and photography are produced to be as accurate as possible; however, actual paint colors may vary from these samples and from batch to batch. Paint colors are affected by many factors, including lighting, age, type of finish, type of surface and adjacent colors. Some colors may require more than one coat for complete coverage. If final color appearance and color matches are critical, paint should be sampled on the actual surface before full applications. Application of the paint constitutes acceptance of the color. Dunn-Edwards assumes no responsibility for the color after application.

**🏠 Low Hide:** Colors that are more transparent and may require multiple coats.

**🏛️ Historic:** Colors that are historically accurate.
